At each public meeting, a brief presentation will be made at 5:45 pm with the workshop immediately following.

Residents, businesses, and others interested in the future of US 60 are invited to attend and participate in a workshop for the US 60 Location/Design Concept Report & Environmental Studies. The Arizona Department of Transportation (ADOT), in coordination with the Federal Highway Administration (FHWA), has initiated a study to identify alternatives that would improve traffic flow and safety on US 60 from Milepost (MP) 222.6 to MP 258.0. The alternatives, such as constructing additional lanes and consolidating access points in the study area, will be evaluated for potential environmental, social, and economic impacts.

The purpose of the meetings is to gather public input on issues, concerns, and opportunities to be considered during the study. At each public meeting, a brief presentation will be made at 5:45 pm with the workshop immediately following. The comments received from this meeting will be used to help identify critical issues to be addressed in the development and evaluations of the alternatives. Study team members will be present to answer your questions and address your concerns. Map displays will be available for viewing.
